

VESOL

LR-6 630W LED

The LR-6 630W LED allows for high performance lighting in vertical and low mounting applications. This powerful, full spectrum, 630 watt fixture is intended for experienced growers full-time use in the vegetative stage through the higher PFPD flower stage.

POWER	SPECTRUM	PERFORMANCE	AMPS / VOLTS	ACCESSORIES
630 Watts	Full Spectrum	PPE: 3.0 umol/s PPF: 1,900 umol/J	5.25A @ 120V 2.63A @ 240V 2.27A @ 277V	8FT AC Power Cable Dimming Cable Hanging Gear

PERFORMANCE

With a power consumption of 630 watts and an impressive output of 1,900 PPF (Photosynthetic Photon Flux), this fixture promises unparalleled efficiency (3.0) for commercial cannabis.

SPECTRUM

Our Full Spectrum offers light emission across the PAR 395-750nm wavelength range. We balance efficiency with quality of light to achieve the desired plant response and work environment.

EXTERNAL CONTROL

0-10 V (Option) fixture is equipped with an external dimming cable and allows for daisy chained installation of up to 200 fixtures per controller. (100 fixtures per controller port).

RELIABILITY

LED & PCBA protected with conformal coating to resist moisture and avoid corrosion. Offers above industry standard surge protection and IP66 water, moisture, & dust protection. Less than 1% failure rate over warranty period.
