## LR-8 830W LED

The LR-8 830W LED allows for high performance lighting in vertical and low mounting applications. This powerful, full spectrum, 830 watt fixture is intended for experienced growers full-time use in the vegetative stage through the higher PFPD flower stage.

POWER	SPECTRUM	PERFORMANCE	AMPS / VOLTS	ACCESSORIES
830 Watts	Full Spectrum	PPE: 3.1 umol/s PPF: 2,573 umol/J	6.92A @ 120V 3.46A @ 240V 3.0A @ 277V	8FT AC Power Cable Dimming Cable Hanging Gear

### PERFORMANCE

With a power consumption of 830 watts and an impressive output of 2,573 PPF (Photosynthetic Photon Flux), this fixture promises unparalleled efficiency (3.1) for commercial cannabis.

### SPECTRUM

Our Full Spectrum offers light emission across the PAR 395-750nm wavelength range. We balance efficiency with quality of light to achieve the desired plant response and work environment.

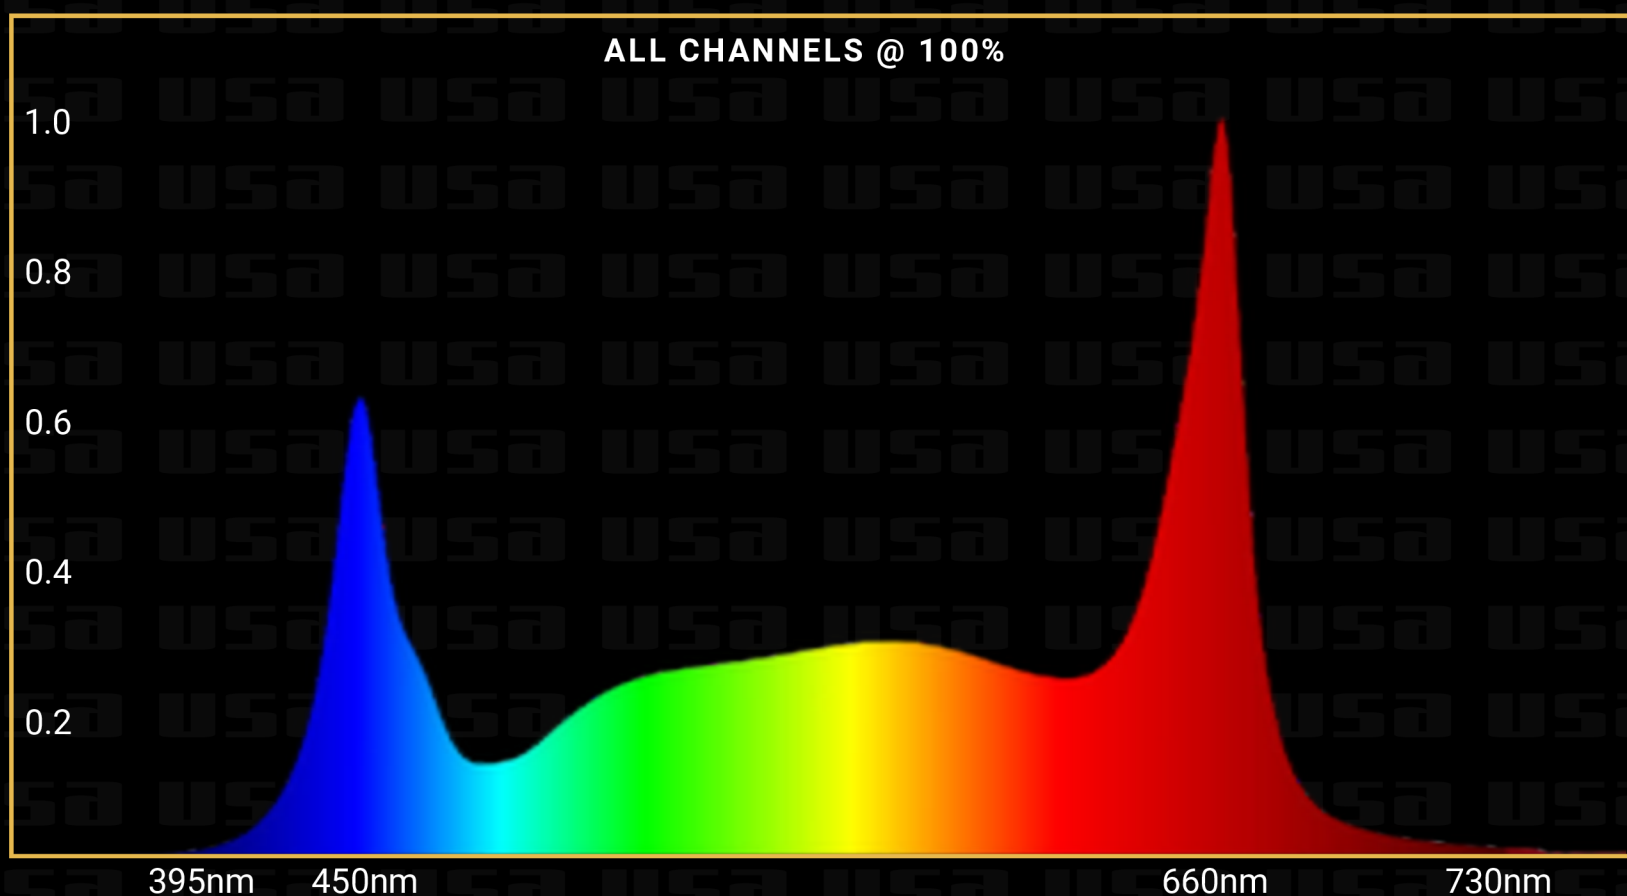

### EXTERNAL CONTROL

0-10 V (Option) fixture is equipped with an external dimming cable and allows for daisy chained installation of up to 200 fixtures per controller. (100 fixtures per controller port).

### RELIABILITY

LED & PCBA protected with conformal coating to resist moisture and avoid corrosion. Offers above industry standard surge protection and IP66 water, moisture, & dust protection. Less than 1% failure rate over warranty period.

### FULL SPECTRUM
